မိုးကောင်းရာသီဥတုနှင့် သစ်တောများ ပေါက်ကွဲနေခြင်းကြောင့်

သစ်တောများ ပေါက်ကွဲနေခြင်းကြောင့် သစ်တောများ ပေါက်ကွဲနေခြင်းကြောင့်

Scientific Name:	<i>Excoecaria agallocha</i>
Common Name:	Milky Mangrove, Blind-your eye Mangrove, river poison tree
Conservation status:	Currently categorized as of Least Concern according to the IUCN Red List of Threatened Species.
Habitat:	This is a back mangrove species and often exploits open areas and is tolerant of disturbed areas.
Key Uses:	This species is used for furniture and ornaments. In Papua New Guinea it is used for pain relief from fish stings. It is also used as a poison to catch fish. Used in traditional medicine and also as firewood.
Sites:	F, G
Taxonomy	
Class:	Eudicots
Order:	Malpighiales
Family:	Euphorbiaceae
Genus:	<i>Excoecaria</i>

Scientific Name:	<i>Rhizophora mucronata</i>
Common Name:	loop-root mangrove, red mangrove or Asiatic mangrove
Conservation status:	Currently categorized as of Least Concern according to the IUCN Red List of Threatened Species.
Habitat:	This species is found in the intermediate to upstream estuarine zone in the lower to mid-intertidal region, and more to the seaward side. This species tolerates a maximum salinity of 40 ppt and a salinity of optimal growth of 8-33 ppt.
Key Uses:	Timber, charcoal, medicine, coastal erosion control, nursery grounds for fish.
Sites:	B,C,F,G,H
Taxonomy	
Class:	Equisetopsida
Super Order	Magnoliidae
Order:	Malpighiales
Family:	Rhizophoraceae
Genus:	<i>Rhizophora</i>

Scientific Name:	<i>Bruguiera cylindrica</i>
Common Name:	Small-leafed Orange Mangrove, Reflexed Orange Mangrove
Conservation status:	Currently categorized as of Least Concern according to the IUCN Red List of Threatened Species.
Habitat:	This species is found in downstream and intermediate estuarine zones in the mid-intertidal region. This species is also shade tolerant.
Key Uses:	Fruit is used for human consumption while timber is sometimes used as firewood.
Sites:	D,E,HG
Taxonomy	
Class:	Eudicots
Order:	Malpighiales
Family:	Rhizophoraceae
Genus:	<i>Bruguiera</i>

Scientific Name:	<i>Rhizophora apiculata</i>
Common Name:	Tall-stilt Mangrove
Conservation status:	Currently categorized as of Least Concern according to the IUCN Red List of Threatened Species
Habitat:	This species is found in the intermediate estuarine zone in the mid-intertidal region. This species tolerates a maximum salinity of 65 ppt and a salinity of optimal growth of 8-15 ppt. Sediment accretion increases the mortality rate of seedlings. This species will not be an efficient colonizer of coastal areas exposed to sudden discharges of sediments such as those of highly eroding watersheds
Key Uses:	The timber is used in salt water piling and fencing. It is also used for house posts, boat building and as firewood.
Sites:	B
Taxonomy	
Class:	Eudicots
Order:	Malpighiales
Family:	Rhizophoraceae
Genus:	<i>Rhizophora</i>
